About City Therapeutics
City Therapeutics is a clinical-stage biotechnology company engineering the next generation of RNA interference (RNAi) therapeutics, with the aim of delivering meaningful and durable benefits for patients in need. City’s lead development programs are CITY-FXI for thromboembolic diseases, CITY-RBP4 for Stargardt disease and other retinal diseases, and CITY-TFR2 for anemia associated with chronic diseases. The City Platform is the engine behind every therapeutic the company develops and integrates deep expertise in trigger engineering, including proprietary cityRNA triggers designed to address limitations of conventional RNAi approaches, tissue-selective delivery, and genetics-driven target selection.
